Victor Hang

Senior Site Reliability Engineer

Bordeaux, Aquitaine FR

vhvictorhang@gmail.com

Victor Hang (https://www.linkedin.com/in/victor-hang) Banh-Canh (https://github.com/Banh-Canh)

Banh-Canh (https://banh-canh.github.io/posts/)

SKILLS

Cloud & Infrastructure

Kubernetes | Kubevirt | Cluster API | Vault | FluxCD/ArgoCD/Sveltos | Openstack | Kamaji | Monitoring

Development & Automation

Golang | Kubebuilder | Python | Git | Docker | Terraform | Ansible | Saltstack

Systems & Databases

NixOS | Flatcar | Debian | RedHat | Postgres | MySQL

EXPERIENCES

Apr, 2026 - Current

Senior Tech Lead - Platform Team @ StackHPC

Senior Tech Lead on the Platform team, developing features for an internal development platform serving HPC and research workloads on Kubernetes and OpenStack.

- Design and build platform features enabling researchers to self-service HPC and compute workloads.
- Deliver Kubernetes-as-a-Service using Cluster API (CAPO) to provision and manage workload clusters on OpenStack.
- Operate and evolve Kubernetes and OpenStack infrastructure underpinning the platform.

Jun, 2023 - Mar, 2026

Site Reliability Engineer @ Thales Cloud Sécurisé

SRE on the Compute & Virtualization team engineering the IaaS core of a SecNumCloud-compliant sovereign cloud (Thales-Google Cloud partnership).

- Built and operated highly available Kubernetes clusters as the sovereign cloud foundation.
- Delivered Kubernetes-as-a-Service with Cluster API (CAPK) to provision and manage workload clusters on KubeVirt.
- Delivered a VM-as-a-Service experience with KubeVirt and multi-homed networking via KubeOVN/Multus.
- Ran production infrastructure atop GCP and Google's internal backend (Borg), owning reliability for the sovereign cloud IaaS core.
- Held on-call responsibility for production services, driving incident response, root-cause analysis, and post-incident follow-up to meet SLOs.
- Collaborated directly with Google engineers on design reviews and knowledge transfer to align the platform with Google Cloud practices.
- Managed a declarative NixOS environment and built Golang operators with Kubebuilder to automate operations.

Nov, 2022 - Jun, 2023

DevOps Consultant at Orange Business Service @ SFEIR

Level 3 DevOps Consultant embedded at Orange Business Services as a senior technical authority for cloud-native architecture and DevOps best practices.

- Architected secure AWS infrastructure with Terraform (VPC, EKS, IAM) and operated mission-critical Kubernetes clusters.
- Centralized secrets with HashiCorp Vault across Terraform and Kubernetes workloads.
- Built a long-term observability stack with Prometheus, Thanos, and Grafana.

Jun, 2021 - Oct, 2022

DevOps Administrator | SysOps @ CHEOPS TECHNOLOGY

DevOps engineer in a squad building an internal, self-service Kubernetes-as-a-Service (KaaS) platform for development teams.

- Built the KaaS platform from scratch, automating server and cluster provisioning with Ansible.
- Implemented GitOps with ArgoCD and CI/CD pipelines with GitLab CI/CD.
- Secured the platform with HashiCorp Vault and Keycloak (OIDC IAM).

PROJECTS

Chihiro

https://github.com/RPCU/chihiro
A Go web app that watches Cluster API (CAPI) resources and offers a self-service dashboard to create, edit, and delete workload clusters via a config-driven templating engine, with OIDC auth and group-based RBAC.

- Golang, OIDC auth, real-time UI over WebSockets
- Config-driven CAPI cluster templating engine
- Group-based RBAC & resource limits

RPCU
https://github.com/RPCU
An open source, multi-tenant cloud platform built from scratch on baremetal, running OpenStack as Kubernetes operators (Yaook) on a reproducible NixOS foundation, with CAPI workload clusters and full GitOps via Flux.

- OpenStack control plane as Kubernetes operators (Yaook)
- NixOS/Colmena nodes with Cluster API (CAPO) workload clusters
- Flux GitOps, Sveltos add-ons, Rook/Ceph & Cilium

Netwatch
https://github.com/Banh-Canh/netwatch
A Kubernetes controller that grants temporary, time-boxed network access via a 'NetworkAccess' CRD, automatically creating and expiring NetworkPolicies to enforce least privilege.

- Golang, Kubernetes controller (Kubebuilder)
- Dynamic, time-boxed NetworkPolicy automation via CRD

MaxTac
https://github.com/Banh-Canh/MaxTac
A Kubernetes controller that abstracts verbose NetworkPolicies behind simple 'Access' and 'ExternalAccess' CRDs, letting developers define connectivity by application logic instead of low-level selectors.

- Golang, Kubernetes controller (Kubebuilder)
- Developer-friendly NetworkPolicy abstraction via CRDs

Songbird
https://github.com/Banh-Canh/songbird
A CLI tool that lints and simulates Kubernetes network connectivity, evaluating NetworkPolicies to predict whether traffic is allowed or denied before changes reach a live cluster.

- Golang, Kubernetes API integration
- NetworkPolicy simulation & pre-deployment validation

NixBook
https://github.com/didactiklabs/nixbook
A declarative, modular NixOS framework for laptops that defines the entire OS (packages, configs, dotfiles) as code with Nix Flakes for reproducible, shareable environments.

- NixOS & Nix Flakes, declarative OS configuration
- Modular profiles with Home-Manager

NixOS-Server
https://github.com/didactiklabs/nixOS-server
A server-focused NixOS configuration applying declarative and GitOps principles to bare-metal Kubernetes hosts, where every change is a git push enabling atomic updates and rollbacks.

- NixOS & Nix Flakes, GitOps for bare-metal (FluxCD)
- Automated, reproducible Kubernetes host provisioning

EDUCATION

2021 - 2021
DevOps Consultant @ ib - groupe Cegos

Major courses: Docker | Kubernetes | Python | Ansible | AWS | Jenkins

2020 - 2020
Network and System Administration @ EPSI

Major courses: TCP/IP | Linux | Windows Server | Scripting | MS SQL Server | Oracle SQL Server

2018 - 2019

Master (1st year) Materials Chemistry @ Université de Bordeaux

Major courses: Solid-State Chemistry | Polymer Chemistry | Crystallography | Materials Characterization | Nanomaterials

2015 - 2018
Bachelor Chemistry @ Université de Bordeaux

Major courses: Organic Chemistry | Inorganic Chemistry | Analytical Chemistry | Physical Chemistry | Spectroscopy | Laboratory Techniques

CERTIFICATIONS

2023-09
GCP Architect
Google Cloud Skills Boost

2022-02
CKA Kubernetes Administrator
Linux Foundation

2021-04
Gitlab Associate
Gitlab
